PROFILE

- **Skilled Frontend Developer** with expertise in building responsive and user-friendly interfaces using modern web technologies
- Passionate about creating clean, efficient, and visually appealing designs, with a strong focus on user experience.
- Adept in leveraging frameworks like React.js and Tailwind CSS to deliver dynamic and high-performance applications

SUMMARY OF EXPERIENCE

- As a versatile developer, I specialize in both frontend and backend development, crafting responsive, visually appealing, and user-centric web interfaces while ensuring robust backend functionality. With expertise in modern technologies like React.js, Tailwind CSS for frontend, and backend proficiency in Node.js and Express, I focus on delivering seamless user experiences and reliable server-side operations. I take pride in writing clean, efficient code that ensures high performance across the full stack, making me passionate about turning creative ideas into fully functional, scalable web applications.

PROJECT

- **Recipe App**
React.js, CSS, Edamam API, Vite, Vercel
Developed a dynamic and responsive recipe search application using React.js and the Edamam API. Users can search for recipes by keyword, view nutritional details, and explore various meal options. Designed a clean, user-friendly UI with reusable React components and CSS styling. Integrated real-time data fetching and managed state efficiently using React hooks. Deployed the app on Vercel for fast and reliable access.

- **YouTube Clone**
React.js, RapidAPI, HTML, CSS, Vercel
Built a responsive YouTube-like video platform using React.js and RapidAPI to fetch and display video content. Implemented video search, trending videos with smooth routing and dynamic content rendering. Designed a clean UI with responsive layouts and deployed the application using Vercel for seamless access.

- **To-Do App (CRUD)**
React.js, Redux, HTML, CSS
Developed a full-featured To-Do application with complete Create, Read, Update, and Delete (CRUD) functionality using React.js and Redux for state management. Enabled task filtering, status updates, and dynamic UI changes with efficient component structure and clean styling. Managed global state with Redux for smooth user experience and consistent performance.

SKILL

- | | |
|---|--|
| • Frontend (HTML, CSS, Tailwind CSS, Bootstrap, JavaScript) | • Version Control (Git, GitHub) |
| • Frameworks & Libraries (React.js, Redux Toolkit) | • Deployment (Vercel, Netlify) |
| • Backend (Node.js, Express.js) | • Package Managers (npm, yarn) |
| • Databases (MySQL, MongoDB) | • Development Tools (VS Code, Postman) |

EDUCATION

- | | |
|---|-------------|
| • Full Stack Development Course From Dice Academy | 2024 - 2025 |
| • Graduation from Delhi University in Bachelors of Arts | 2021 - 2024 |
